## **FWD PC-503P**

### Polycarboxylate ether superplasticizer

**FWD PC-503P** is a kind of polycarboxylate based superplasticizer with excellent dispersibility, which endoses concrete with good construction performance and significantly improves the mechanical properties and durability of hardened concrete.

### Technical Data

Property	Value
Physical form	White to light beige powder
Solids content (%)	≥97
Cl- % (by converted solid content)	≤0.1
PH Value (40% aqueous solution)	4.0 ± 1.0
Active content (%)	95 min

### Applications

- \* Precast concrete
- \* High strength concrete
- \* Cast-in-place concrete
- \* Pumped concrete
- \* Self-consolidating concrete
- \* Ready-mixed concrete

### Packaging

25 kg paper bags inner with PE bags.

### Storage and Shelf Life

recommended 2°C~35°C storage in a dry, ventilated warehouse to avoid direct sunlight or rain.

The shelf life of this product is 12 months, and pass the test before use beyond the time.
